## **Executive summary**

**Fires in South America are at their highest since systematic monitoring began in 1998. During March, April and May 2020 respectively, fire hot spots have reached peaks of 17%, 32% and 9% higher than previously registered peaks.**

**This report identifies priority areas with a high probability of fire threat, in order to support decision making and planning strategies to mitigate the risk and impact of fires. The focus is on South American protected areas, given the importance of protecting these areas of high biological, environmental and sociocultural value. In addition, these areas have an institutional structure, legal framework and in most cases, a management plan that allows the use of the information presented in this report to guide actions on the ground. In South America, we identified 117 Protected Areas (P.A.) under High Alert and Alert. In total, there are more than 287,000 km<sup>2</sup> and 146,000 km<sup>2</sup> under High Alert and Alert fire threat conditions across the continent over the next three months.**

**Among the recommendations, we highlight the importance of early identification of Protected Areas under High Alert and Alert conditions. In these areas strategic planning and communication networks can be implemented, to enable the population living inside and in the surroundings to plan for minimising the risk and impacts of uncontrolled wildfires.**

## Overview

Fire occurrence negatively impacts people, ecosystems and climate. The impacts on people include threat to lives, loss of goods such as homes, agricultural production, forest products, infrastructure (communication networks, light, roads), transport, and diseases associated with increased air pollution<sup>1,2</sup>. The impacts on ecosystems are related to the decrease in biodiversity, wildlife mortality, decrease in carbon stocks as well as effects on other environmental services such as maintenance of local temperature and the cycling of water to the atmosphere. Climate impacts are associated with the carbon emissions to the atmosphere, which could lead to more extreme weather conditions, such as increased droughts and prolonged dry seasons<sup>2</sup>. It has been estimated that fires associated with deforestation in the Amazon cause approximately 3,000 premature deaths annually across South America<sup>3</sup>, which can put increased pressure on health resources, and the carbon emissions from fires during drought years can be higher than those from deforestation emissions<sup>4</sup>.

So far this year, fires in South America are at their highest since 1998 in the months of March (31,529 hot spots, 17% higher than the previous peak), April (23,139 hot spots, 32% higher than the previous peak) and May (13,638 hot spots, 9% higher than the previous peak), with the other months presenting detections higher than the long-term average<sup>5</sup>.

This Report aims to identify priority areas with a high probability of fire threat, in order to support decision making and planning strategies to mitigate the risk and impact of fires. The focus is on South American protected areas, given the importance of preserving these areas of high biological, environmental and sociocultural value. In addition, these areas have an institutional structure, legal framework and in most cases, a management plan that allows the use of the information presented in this report to guide actions on the ground.

The document is structured in four sections. First, we present the Priority Areas, the Fire Probability Categories and the Recommendations. Next, the Technical Information is presented, divided into three topics: Seasonal forecasts for temperature and rainfall, Fire trend methods, and the Protected Area classes used. Finally, a Glossary with the definition of technical words used in the report, and the list of References are presented.

\*\*\*

## ***Priority Areas for mitigating fire probability***

### ***August – October 2020***

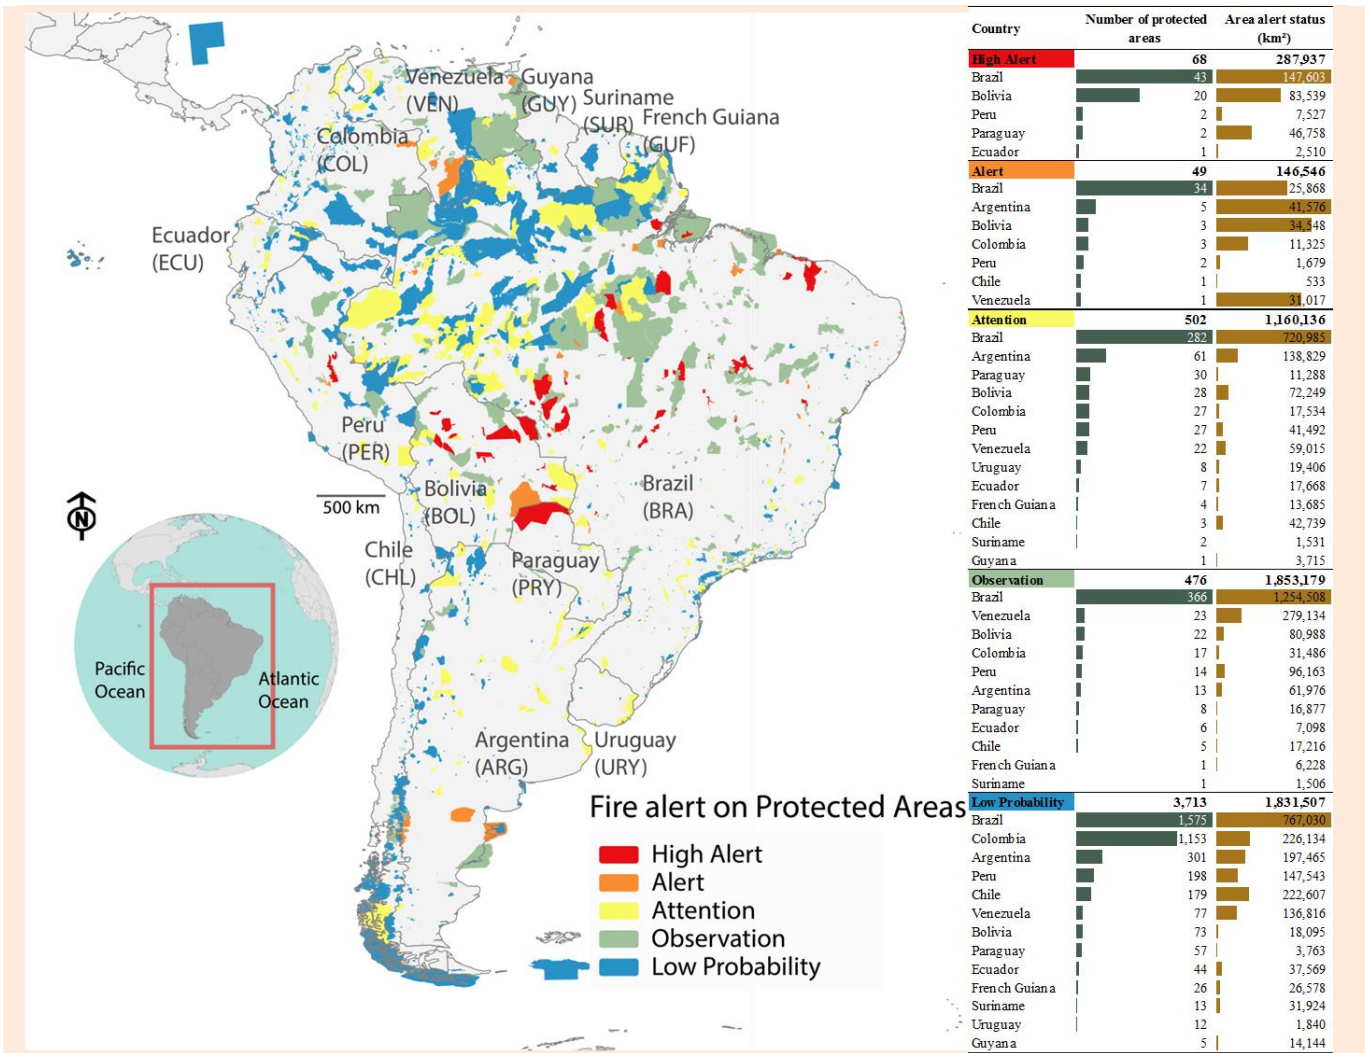

The fire probability for August to October presented here has been generated based on the integration of three datasets: the fire trend and peak of fires in the August-October period, the rainfall, and the temperature forecast. The definition of the fire probabilities per category (High Alert, Alert, Attention, Observation and Low Probability) is presented in the next section. The technical and methodological information are described at the end of this document.

In South America, we identified 68 Protected Areas (P.A.) with High fire probability: 43 P.A. in Brazil, 20 in Bolivia, 2 in Peru, 2 in Paraguay and 1 in Ecuador; and 49 P.A. within the Alert level: 34 in Brazil, 5 in Argentina, 3 in Bolivia, 3 in Colombia, 2 in Peru, 1 in Venezuela and Chile (Figure 1, Table 1). The complete list of the identified protected areas in each category is presented in Annex 1 and 2. All these areas presented an increase in August-October total fire occurrence from 2017 to 2019, and have high forecast probabilities of experiencing above-median temperatures and below-median rainfall, depicting the socio-environmental-climatological conditions favourable to wildfires. In total, there are more than 287,000 km<sup>2</sup> and 146,000km<sup>2</sup> under High Alert and Alert of fire threat in the next three months.

**Table 1. Summary of Protected areas per August-October fire probability category in South America.**

<b>Status</b>	<b>Number of protected areas</b>	<b>Area alert status (km<sup>2</sup>)</b>
High Alert	68	287,937
Alert	49	146,546
Attention	502	1,160,136
Observation	476	1,853,179
Low Probability	3,713	1,831,507
<b>Total</b>	<b>4,808</b>	<b>5,279,305</b>

**Figure 1. Spatial distribution of the Protected Areas and the summary in each probability category, for each country.**

\*\*\*

## *Fire probability categories*

In Table 2 we present the summary of the data integration, structured by fire probability category. The fire trend and the accumulated active fires in each fire season (Aug-Oct) of the period from 2017 to 2019 were calculated for all the Protected Areas (PA). The climatological conditions (the probability of temperature being above the climatological median, and rainfall being below the median, for Aug-Oct 2020) were obtained by area-weighted averaging of the grid cells in each PA.

The Alerts were classified into five categories: High Alert, Alert, Attention, Observation and Low Probability. These categories refer to the level of probability of the occurrence of fire events.

The description of each category is presented below:

### **High Alert**

This is defined as: (1) there is an observed positive trend in fire occurrence (increased number of fire occurrences every year from 2017-2019), (2) accumulated active fires higher than 75% of the distribution of fires in the Protected Areas, (3) 60% or higher probability of lower than average rainfall, and (4) 60% or higher probability of higher than average temperature, which represents the climatological condition for increased risk of fire occurrences.

### **Alert**

This is defined as: (1) a positive trend in fire occurrence (increased number of fire occurrence every year from 2017-2019), (2) accumulated active fires more than 50% and less than 75% of the distribution, (3) 60% or higher probability of lower than average rainfall, and (4) 60 % or higher probability of higher than average temperature, which represents the climatological condition for increased risk of fire occurrences.

### **Attention**

This is defined as: (1) a positive trend in fire occurrence (increased number of fire occurrences every year from 2017-2019), (2) the number of accumulated active fires is less than 50% of the distribution, but it has one or none of the climatological conditions including (3) probability of below-average rainfall and (4) probability of above-average temperature.

## Observation

This is defined as: (1) areas with a negative trend of hot pixels, (2) high accumulated fire values (> 75%) in areas where both or one of the meteorological variables, (3) rainfall or (4) temperature, is forecast with a probability of 60% or higher for enhanced fire-prone conditions.

## Low Probability

This is defined as: (1) areas without fires detected for the Aug-Oct period since 2017 or with negative fire trend, (2) accumulated hot pixels lower than 75%, although one of the meteorological conditions (3) rain or (4) temperature may have a high probability for establishing a condition for fire spread. This category also includes areas where the trend is negative and both climatological conditions for fire risk have lower probabilities to occur.

**Table 2. Summary of the variables for the different fire probability categories.**

	Hot pixel occurrence trend	Accumulated hot pixels August - October (2017-2019)	Probability of below-average Rainfall	Probability of above-average Temperature
<b>High Alert</b>	Trend + 	$\geq 106$	$\geq 60\%$	$\geq 60\%$
	<b>Alert</b>	Trend + 	$\geq 17; < 106$	$\geq 60\%$
<b>Attention</b>	Trend + 		$< 60\%$	$\geq 60\%$
	Trend + 	$< 17$	$\geq 60\%$	$\geq 60\%$
	Trend + 		$\geq 60\%$	$< 60\%$
	Trend + 		$< 60\%$	$< 60\%$
<b>Observation</b>	Trend - 	$\geq 106$	$\geq 60\%$	$< 60\%$
	Trend - 	$\geq 106$	$< 60\%$	$\geq 60\%$
	Trend - 		$\geq 60\%$	$\geq 60\%$
<b>Low Probability</b>	Trend - 	No hot pixel registered		
	Trend - 		$< 60\%$	$< 60\%$
	Trend - 	$< 106$	$\geq 60\%$	$< 60\%$
	Trend - 	$< 106$	$< 60\%$	$\geq 60\%$

\* in red, climatological condition for increased fires

\*\*\*

## *Recommendations*

Here we summarise a list of recommendations to support the bodies responsible for the Protected Areas:

- \* Be aware of areas that might have High Alert and Alert status.
- \* Limit fire use in High Alert and Alert regions until the end of October or the onset of the rainy season.
- \* Co-develop a strategy with the local communities to establish a support network when fire use is necessary: contact the fire brigade and fire fighter volunteers to be present before, during and after the fire use in the management lands. This is particularly important for assisting an elderly population, or small families which may not have the capacity to combat fire if it escapes to the surrounding areas.
- \* Take more precautions when using fire in High Alert and Alert areas: create firebreaks, observe the wind direction and the day temperature before starting the fire, check the fuel load (grass, trees, shrubs, wooden infrastructure), have extinguishing strategies in place.
- \* Communicate the fire probability to local communities living inside and surrounding Protected Areas. Discuss mitigation strategies and exchange contacts.
- \* Check communication equipment is available and functioning: radio devices, batteries, telephone lines, internet.
- \* Organise a contact list of key people: community leaders, fire brigade, Protected Area Managers, local Associations, Local Secretariats and NGOs, local media and press. This information should be in a visible and accessible place.
- \* Organise group discussions by the Protected Area managers, teams and local communities to prepare management plans for fire probability and a response strategy in case of wildfires.

\*\*\*

## *Technical Information*

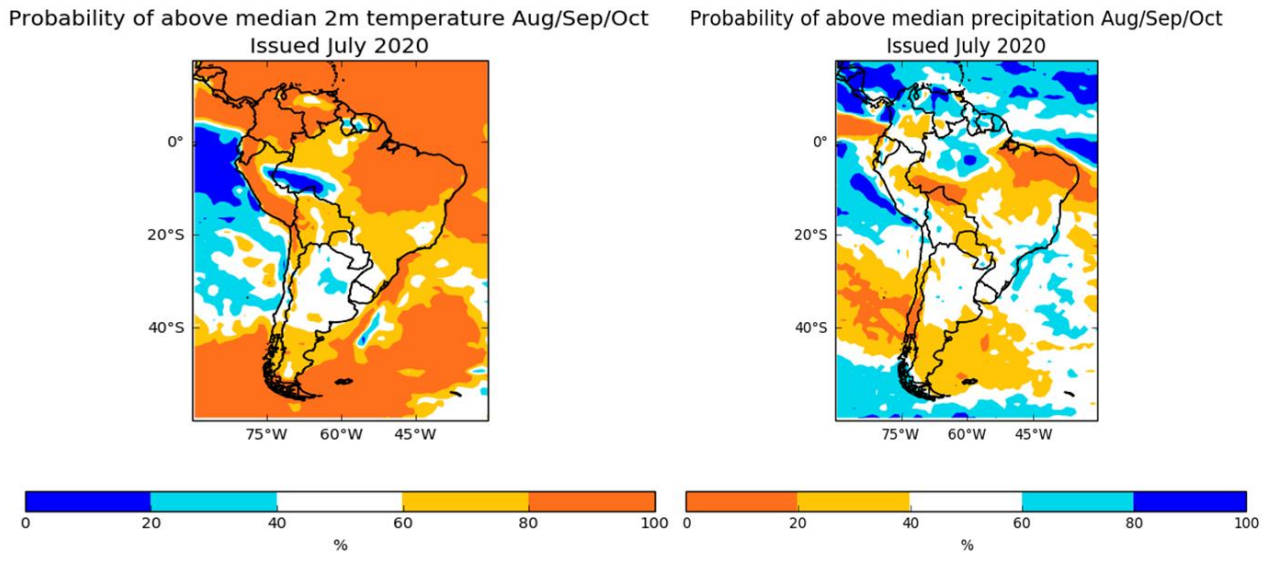

### *Seasonal forecast for temperature and rainfall: August – October 2020*

This seasonal outlook provides an indication of possible temperature and rainfall conditions over South America over the next 3 months - August to October. The forecast is the average for the period, and is based on information from observations, seasonal forecast systems including GloSea5<sup>6,7</sup> and expert judgment.

#### **Summary: Temperature and Rainfall**

**For August-September-October 2020 as a whole, above average temperatures are more likely than below-average temperatures over much of the continent, with the highest probability for above-average across the Northwest, and in central-eastern Brazil. Rainfall is more likely to be below average across central and eastern regions (Figure 2). The combination of above average temperatures and below average rainfall could have implications for areas exposed to a higher probability of fire threat over the forthcoming fire season, if fuel and ignitions are also present, as illustrated in Figure 1.**

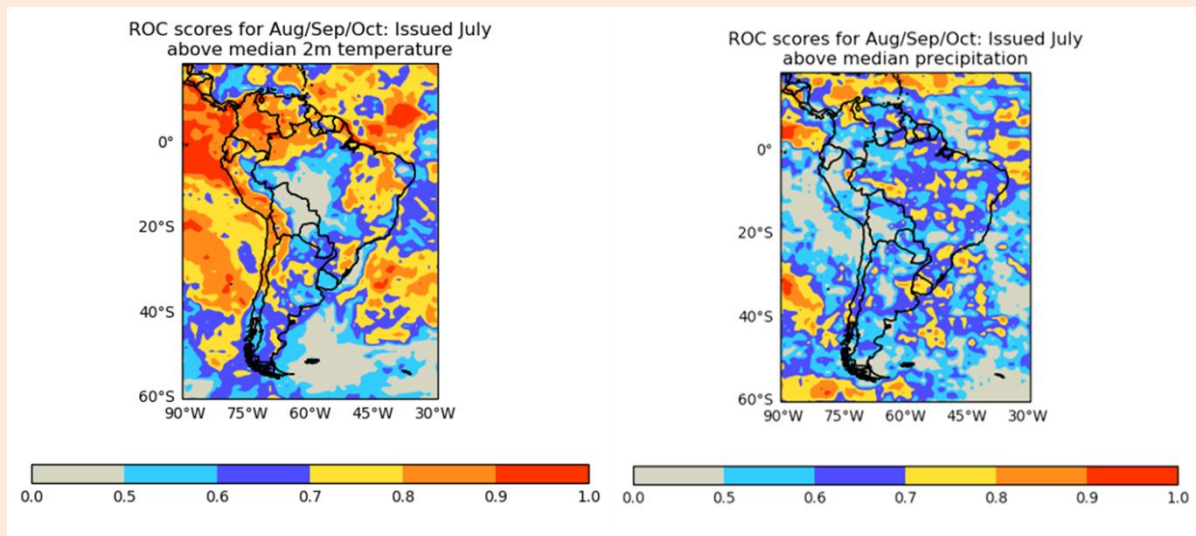

For most of the central and north of the South American continent shown in Figure 2, the GloSea5<sup>7</sup> forecast probabilities for above median temperature are above 60% for 2020. The highest probability for above average temperature is over the East and Northwest, where forecast probabilities exceed 80%. Across the far northwest of Brazil there is a signal for below median temperatures in GloSea5. There is good agreement across different seasonal forecast models for higher than average temperatures across most of the continent.

**Figure 2: Forecast probabilities (%) above the climatological median (1993-2016) for temperature (left) and rainfall (right) for August-October 2020. The orange areas indicate above average temperature / below average rainfall, and the blue areas indicate below average temperature / above average rainfall.**

Central and eastern regions are more likely to see below-median rainfall, including Brazil, eastern Peru, eastern Bolivia, and Paraguay, as well as regions across southern Venezuela, Columbia, Ecuador, Chile and southern Argentina. In general across most of the continent, above-average rainfall is unlikely. However there is a signal for enhanced rainfall in the north of the continent across a number of models including GloSea5, which may extend into northern Brazil. The highest probability for below average rainfall is in the far east and centre of the continent. There is agreement across different seasonal forecast models for drier than average conditions across the far south, central and east of the continent, and for above average rainfall in the far north. Some of these signals are likely to be driven by the increasing signal for La Niña conditions in the Pacific.

Forecast skill<sup>8</sup> is generally higher for temperature than for rainfall in GloSea5 (Figure 3). The skill level is high in the north, east and far west of the South American continent for above-average temperature forecasts. It is lower in the south, and the lowest skill is in the centre of the region (west Brazil/east Bolivia). There are areas of skill across the continent for rainfall, while the lowest skill for forecasts of below-average rainfall is across the west.

**Figure 3: ROC forecast skill scores for above median temperature (left) and rainfall (right). A ROC score of greater than 0.5 means the forecast has skill.**

The probability forecast maps presented in this report show the probability of the three-month average temperature/rainfall being above the climatological median (1993-2016) using the Met Office GloSea5<sup>7</sup> seasonal forecast system. The probability of the three-month mean being below average is the opposite, i.e. a 20% probability of above average temperature corresponds to an 80% probability of below average temperature. The orange colours indicate a high probability for above average temperature and below average rainfall; blue colours indicate below average temperature and above average rainfall. White colours are where probabilities are evenly balanced (between 40% and 60%). Where comparisons with other seasonal forecast models are referred to, these are based on 5 other systems available from the Copernicus Climate Change Service<sup>9</sup>.

\*\*\*

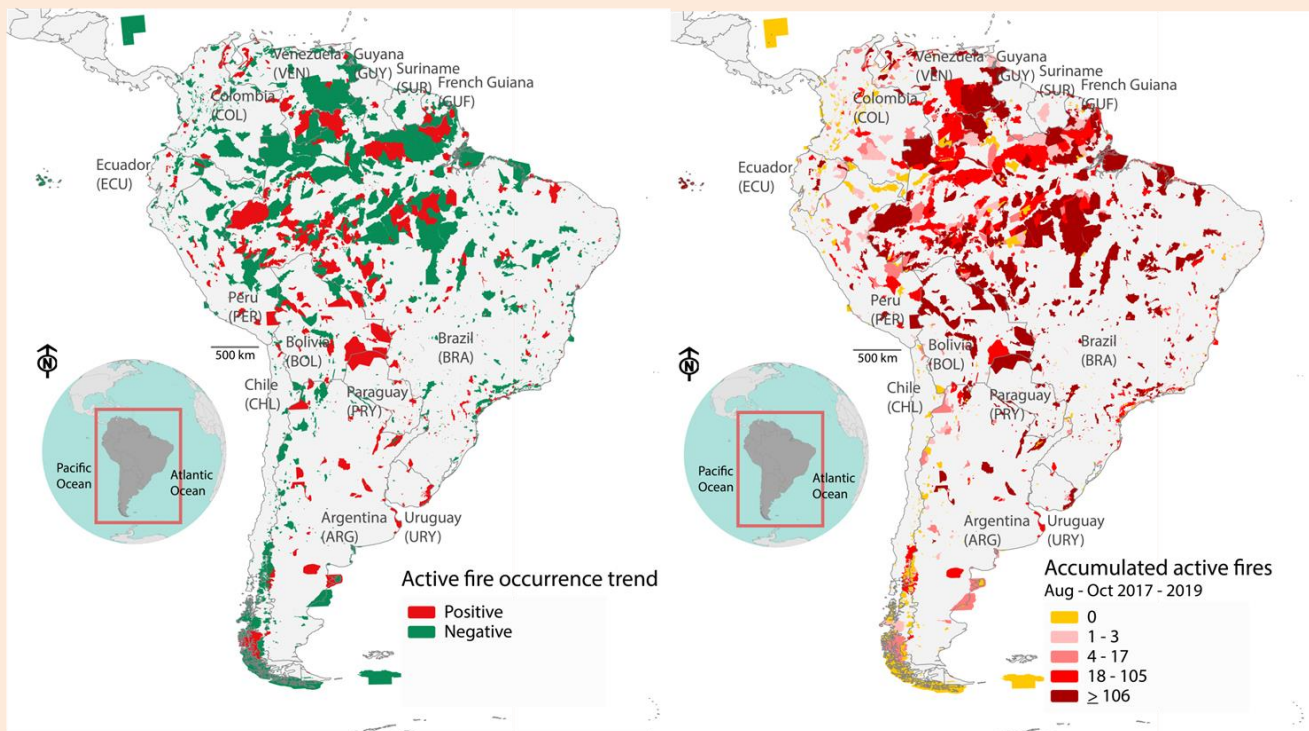

## *Fire trend: August – October 2020*

The fire trend (Figure 4a) was calculated using the hot pixel VIIRS product, covering the months from August to October, from 2017 to 2019. The slope of the trend regression is defined as (Equation 1):

$$b_{(i,j)} = \frac{\sum (x - \bar{x})(y - \bar{y})}{\sum (x - \bar{x})^2}$$

where  $x$  corresponds to the specific year (independent variable),  $\bar{x}$  is the average of all years,  $y$  is the number of hot pixels (dependent variable) for the specific year  $x$ , and  $\bar{y}$  is the average of hot pixels between all years.

In addition to the fire trend (Figure 4a), the quartiles of the accumulated hot pixels occurring in the August-October period from 2017 to 2019, per PA was also considered (Figure 4b). Areas with 50% or 75% of fires concentrated during the period were also used to stratify the PA into the different fire probability categories.

**Figure 4: a) Fire trend and b) accumulated hot pixels for the South American Protected Areas, (2017-2019, period August to October).**

\*\*\*

## *Protected Areas*

Although the International Union for the Conservation of Nature (IUCN)<sup>10</sup> establishes six general protected areas management categories, each country has its own category system according to their different scopes. Many protected areas do not fall under the general IUCN categories, thus making it difficult to compare them between different countries. Among the areas with High Alert, there are: 24 Indigenous Area/Reserve/Territory, 10 Environmental Protection Area, 5 Municipal Protected Area/Reserve, 5 Park/Regional Park/National Park, 4 Wildlife Refuge/Sanctuary, 3 National/State Forests, 2 Extractive Reserve, 2 UNESCO-MAB Biosphere Reserve, 2 World Heritage Site (natural or mixed) and one of each of the following categories: Biosphere Reserve and Indigenous Territory, Communal Reserve, Departmental Park, Departmental Reserve, Ecological Station, Natural Integrated Management Area, Natural Monument, Ramsar Site, Wetland of International Importance, Regional Conservation Area and Watershed Protection Area.

In Table 3, below, a summary of the protected areas and fire occurrence for the August-October period is presented, covering 2017 to 2019. Brazil, Colombia and Argentina have the highest number of protected areas, and Venezuela and French Guiana have more than 50% of their territories under this land tenure. Brazil, Bolivia and Paraguay have the highest number of hot pixels per km<sup>2</sup> of the Protected Areas.

**Table 3. Summary of the Protected Areas and fire occurrence per country, for the August-October, 2017-2019 period.**

Country		Number of protected areas	Protected area (km <sup>2</sup> )	% country area	Accumulated hot pixels (August - October) 2017-2019	Accumulated hot pixels per km <sup>2</sup>
Brazil	BRA	2,300	2,915,995	0.34	542,100	0.19
Colombia	COL	1,200	286,479	0.25	1,259	0.00
Argentina	ARG	380	439,845	0.16	24,889	0.06
Peru	PER	243	294,404	0.23	4,381	0.01
Chile	CHL	188	283,095	0.38	322	0.00
Bolivia	BOL	146	289,418	0.27	96,279	0.33
Venezuela	VEN	123	505,981	0.56	12,594	0.02

\*\*\*

## *Glossary*

**Climatological median:** The central value of the Aug-Sep-Oct average temperatures or rainfall, over the period 1993-2016.

**GloSea5:** Met Office seasonal forecasting system, based on the HadGEM3 global climate model.

**Hot pixel:** Temperature anomaly detected by satellite over the land surface of the planet. The hot pixel is a proxy for an active fire on the ground.

**Probability:** The likelihood of the event happening or being the case. In this report, we focus on the probability of lower than average rainfall and higher than average temperature occurring, for the average of the August-October period.

**ROC score:** A measure of skill in seasonal forecasting. Values above 0.5 mean the forecast has more skill than simply using climatology.

**Trend:** Tendency of fire occurrence. The trend can be positive, negative or statistically no different from zero, thus no trend. Positive trend means that each year, more fires are occurring inside the Protected Area. Negative trend means that the total number of fires inside the Protected Area is decreasing. No trend means that the number of fires occurring inside the protected area is more or less constant, which can be low or high.

	Pimentel Barbosa	Indigenous Area	3,276.49
	Pirineus de Souza	Indigenous Area	284.46
	Urubu Branco	Indigenous Area	1,676.68
	Nambikwara	Indigenous Area	10,100.60
	Tubarão Latunde	Indigenous Area	1,167.41
	Cachoeirinha	Indigenous Area	363.07
	Inawebohona	Indigenous Area	3,773.37
	Trincheira Bacaja	Indigenous Area	16,546.63
	Paresi	Indigenous Area	5,622.65
	Utiariti	Indigenous Area	4,098.28
	Tirecatinga	Indigenous Area	1,304.81
	São Marcos - MT	Indigenous Reserve	1,742.11
	Merure	Indigenous Area	827.86
	Parque do Aripuanã	Indigenous Area	16,007.97
	Erikbaktsa	Indigenous Area	810.98
	Sararé	Indigenous Area	674.49
	Terena Gleba Iriri	Indigenous Reserve	305.41
	Krenrehé	Indigenous Reserve	59.50
	Krahó-Kanela	Indigenous Reserve	76.99
	Parque Estadual Encontro Das Águas	Park	1,081.28
	Área De Proteção Ambiental Jalapão	Environmental Protection Area	1,349.51
	Área De Proteção Ambiental Do Rio Curiaú	Environmental Protection Area	218.73
	Área De Proteção Ambiental Serra Da Ibiapaba	Environmental Protection Area	16,241.89
	Área De Proteção Ambiental Dos Morros Garapenses	Environmental Protection Area	2,343.00
	Área De Proteção Ambiental Foz Do Rio Santa Tereza	Environmental Protection Area	501.44
	Floresta Nacional Altamira	Forest	7,252.56
	Parque Nacional Das Nascentes Do Rio Parnaíba	Park	7,497.70
	Floresta Estadual Do Araguaia	Forest	223.38
	Área De Proteção Ambiental Lago De Peixe/Angical	Environmental Protection Area	754.52
	Área De Proteção Ambiental Serra Geral De Goiás	Environmental Protection Area	441.47
	Área De Proteção Ambiental Delta Do Parnaíba	Environmental Protection Area	3,095.90
	Parque Nacional Do Araguaia	Park	5,555.04
	Reserva Extrativista Terra Grande Pracuuba	Extractive Reserve	1,948.64
	Área De Proteção Ambiental Da Foz Do Rio Das Preguiças - Pequenos Lençóis - Região Lagunar Adjacente	Environmental Protection Area	2,061.78
	Reserva Extrativista Rio Cajari	Extractive Reserve	5,324.05
	Estação Ecológica Do Castanhão	Ecological Station	125.80
Floresta Nacional Do Jamaxim	Forest	13,015.97	
Área De Proteção Ambiental Marimbus / Iraquara	Environmental Protection Area	1,248.86	
Ecuador	Sangay National Park	World Heritage Site (natural or mixed)	2,509.81
Peru	El Sira	Communal Reserve	6,168.52
	Imiria	Regional Conservation Area	1,358.22
Paraguay	Gran Chaco	UNESCO-MAB Biosphere Reserve	45,774.81
	Cerro Chovoreca	Natural Monument	983.33

## Annex 2

### Identification of priority areas for reducing the likelihood of burning and forest fires in South America August to October 2020

Country (ISO3)	Protected area name	Protected area category	Area (km <sup>2</sup> )	Alert Status
ARG	Laguna Negra	Multiple Use Provincial Reserve	13.38	Low Probability
ARG	Cipresal de las Guaitecas	Protected Nature Area	38.91	Low Probability
ARG	Ría Azul - Lago Escondido	Protected Nature Area	766.39	Low Probability
ARG	San Guillermo - Zona núcleo	UNESCO-MAB Biosphere Reserve	1,639.75	Observation
ARG	Ñacuñan	UNESCO-MAB Biosphere Reserve	281.94	Low Probability
ARG	Pereyra Iraola	UNESCO-MAB Biosphere Reserve	102.78	Low Probability
ARG	Río Valdez	Multiple Use Provincial Reserve	27.43	Low Probability
ARG	Playa Larga	Nature and Cultural Reserve	0.32	Low Probability
ARG	Abra del Acay	Nature Monument	381.81	Observation
ARG	San Guillermo - Zona de amortiguamiento	UNESCO-MAB Biosphere Reserve	7,821.57	Observation
ARG	Lagunas de San Vicente	Municipal Nature Reserve	7.19	Low Probability
ARG	Andino Norpatagónica	UNESCO-MAB Biosphere Reserve	23,574.35	Alert
ARG	Parque Atlántico Mar Chiquito	UNESCO-MAB Biosphere Reserve	286.23	Attention
ARG	Parque Costero del Sur	UNESCO-MAB Biosphere Reserve	267.70	Low Probability
ARG	Delta del Parana	UNESCO-MAB Biosphere Reserve	910.64	Attention
ARG	Laguna Oca del Río Paraguay	UNESCO-MAB Biosphere Reserve	617.18	Attention
ARG	Laguna Blanca	UNESCO-MAB Biosphere Reserve	6,424.43	Low Probability
ARG	Epulauquen	Tourist and Forest Provincial Reserve	308.97	Low Probability
ARG	Copahue Caviahue	Provincial Park	287.53	Alert
ARG	Chañy	Forest Reserve	49.87	Low Probability
ARG	Batea Mahuida	Forest Reserve	20.43	Low Probability
ARG	Nant y Fall (Arroyo Las Caídas)	Tourist Nature Reserve	6.07	Low Probability
ARG	Lago Baggilt	Protected Nature Area	17.65	Low Probability
ARG	San Lorenzo	Provincial Reserve	215.21	Low Probability
ARG	Lago del Desierto	Provincial Reserve	597.47	Low Probability
ARG	Punta Gruesa	Provincial Reserve	23.17	Low Probability
ARG	Corazon de la Isla	Multiple Use Provincial Reserve	1,022.50	Low Probability
ARG	Azul	Provincial Park	71.85	Low Probability
ARG	Itacuarahy	Private Refuge	2.44	Low Probability
ARG	Chancay	Private Wildlife Refuge	2.66	Low Probability
ARG	Lago Epuyén	Forest Reserve	189.16	Observation
ARG	Río Turbio	Provincial Park and Forest Reserve	748.85	Low Probability
ARG	Florencio de Basaldua	Nature Monument	2.49	Low Probability
ARG	El Paraíso	Private Reserve	4.38	Low Probability
ARG	Ingeniero Agrónomo Roberto Cametti	Provincial Park	1.30	Low Probability
ARG	Yaguarundi	Private Wildlife Refuge	4.03	Low Probability
ARG	Teyú Cuare	Provincial Park	0.79	Low Probability
ARG	Sierra Crovetto	Provincial Park	10.22	Low Probability
ARG	Chachi	Private Wildlife Refuge	0.18	Low Probability
ARG	Mbotaby	Ecological Reserve	0.13	Low Probability
ARG	Cerro Azul	Multiple Use Reserve	3.85	Low Probability
ARG	Paraje los Indios	Municipal Nature Park	0.21	Low Probability

ARG	Amado Bonpland	Municipal Nature Park	0.05	Low Probability
ARG	Puerto San Juan	Private Reserve	2.62	Attention
ARG	Cuña Pirú	Private Reserve	54.91	Low Probability
ARG	Isla Palacios	Nature Monument	1.68	Low Probability
ARG	Caa Pora	Private Reserve	0.40	Low Probability
ARG	La Ponderosa	Private Reserve	1.99	Low Probability
ARG	Uruzu	Provincial Park	24.88	Low Probability
ARG	Urugua-í	Wildlife Reserve	31.49	Low Probability
ARG	Valle del Arroyo Cuña-Pirú	Provincial Park	123.72	Attention
ARG	Grupo de la Isla	Provincial Park	0.17	Low Probability
ARG	Guaramboca	Provincial Park	21.69	Low Probability
ARG	Yacuy	Provincial Park	3.61	Low Probability
ARG	Puerto Peninsula	Provincial Park	69.80	Low Probability
ARG	Papel Misionero	Cultural Nature Reserve	104.81	Low Probability
ARG	Guarani	Experimental Area	52.16	Low Probability
ARG	San Miguel de la Frontera	Private Reserve	52.09	Attention
ARG	Sierra de San Javier	University Park	121.28	Attention
ARG	Quebrada del Portugués	Nature Reserve	76.91	Low Probability
ARG	Cumbres Calchaquies	Provincial Park	679.31	Observation
ARG	Santa Ana	Nature Reserve	172.61	Low Probability
ARG	La Angostura	Strict Nature Reserve	16.72	Low Probability
ARG	Los Sosa	Nature Reserve	27.00	Attention
ARG	La Florida	Provincial Park	93.37	Low Probability
ARG	Las Lancitas	Provincial Nature Reserve	110.83	Low Probability
ARG	Laguna Pintascayo	Provincial Park	158.10	Low Probability
ARG	Carabajal	Wildlife Reserve	11.00	Low Probability
ARG	Quebrada de Humahuaca	Protected Landscape	5,460.31	Low Probability
ARG	Ischigualasto	Provincial Park	665.40	Low Probability
ARG	Valle Fértil	Multiple Use Reserve	7,776.00	Attention
ARG	Cerro Alcázar	Nature Monument	1.02	Low Probability
ARG	Pedernal	Protected Landscape	193.70	Attention
ARG	La Ciénaga	Protected Nature Area	139.66	Low Probability
ARG	Villavicencio	Private Reserve	624.30	Low Probability
ARG	Dique Quebrada de Ullum	Protected Landscape	4.40	Low Probability
ARG	Islote Muicipal Curupi	Municipal Reserve	0.17	Low Probability
ARG	Islas de Victoria	Multiple Use Nature Reserve	4,303.14	Attention
ARG	Boca de la Laguna Herradura	Fisheries Reserve	2.19	Low Probability
ARG	Boca del Rio Bermejo	Fisheries Reserve	3.57	Low Probability
ARG	Arroyo Ramirez	Fisheries Reserve	2.19	Low Probability
ARG	Puerto Dalmacia	Fisheries Reserve	1.65	Low Probability
ARG	Apipé Grande	Provincial Nature Reserve	47.07	Attention
ARG	Rincón de Santa María	Provincial Nature Reserve	71.38	Attention
ARG	La Aurora del Palmar	Private Wildlife Refuge	21.23	Low Probability
ARG	Bahía de Samborombón	Integral Nature Reserve	3,871.69	Attention
ARG	Pehuen Co-Monte Hermoso	Nature Reserve	572.24	Low Probability
ARG	Arroyo Zabala	Multiple Use Nature Reserve	15.80	Low Probability

ARG	Ernesto Tornquist	Provincial Park	70.26	Low Probability
ARG	Rincón de Ajó	Integral Nature Reserve	14.96	Low Probability
ARG	Guardia del Juncal	Municipal Nature Reserve	1.30	Low Probability
ARG	Punta Lara	Mixed Integral Nature Reserve	55.84	Low Probability
ARG	Mar Chiquita	Multiple Use Nature Reserve	83.65	Attention
ARG	Rio Lujan	Multiple Use Nature Reserve	12.52	Low Probability
ARG	Barranca Norte	Nature Reserve	1.17	Low Probability
ARG	Mar Chiquita	Wildlife Refuge	629.56	Attention
ARG	Arroyo Los Gauchos	Multiple Use Nature Reserve	5.66	Low Probability
ARG	Arroyo El Durazno	Nature Reserve	4.41	Low Probability
ARG	Caleta de los Loros	Multiple Use Reserve	90.79	Low Probability
ARG	Complejo Islote Lobos	Scientific Nature Reserve	186.81	Low Probability
ARG	Punta Bermeja	Protected Nature Area	18.97	Low Probability
ARG	Península de Magallanes	Provincial Reserve and Park	454.77	Low Probability
ARG	Loro Hablador	Provincial Reserve	190.83	Low Probability
ARG	Isla de Las Damas	Municipal Nature Reserve	15.06	Low Probability
ARG	Isla Del Cerrito	Provincial Park	109.12	Low Probability
ARG	Potrero de Yala	Provincial Park	45.46	Low Probability
ARG	Los Diques	Provincial Reserve	216.13	Low Probability
ARG	Lotes 1703-1704-4325-4326-4336-19866	Multiple Use Reserve	253.52	Low Probability
ARG	Acambuco	Flora and Fauna Reserve	80.04	Attention
ARG	Fracciones 50 y 51 del Lote Fiscal 3	Multiple Use Nature Reserve	76.22	Attention
ARG	Islote de la Gaviota Cangrejera	Integral Nature Reserve	2.92	Low Probability
ARG	Zanjon de Loreto	Urban Multiple Use Nature Reserve	12.14	Low Probability
ARG	San Guillermo	Provincial Park	9,459.81	Low Probability
ARG	Bosques Protectores	Reserva Pública	18.40	Low Probability
ARG	Finca Las Costas	Multiple Use Nature Reserve	108.09	Low Probability
ARG	Quebrada de Cafayate	Managed Nature Reserve	953.30	Low Probability
ARG	Angastaco	Nature Monument	137.42	Low Probability
ARG	Laguna Leandro	Nature Monument	3.52	Low Probability
ARG	Don Carmelo	Private Reserve	399.69	Low Probability
ARG	El Gato y Lomas Limpias	Multiple Use Reserve	997.81	Attention
ARG	Escuela Rural Juan B. Alberdi	Multiple Use Reserve	0.15	Low Probability
ARG	Escuela Rural Enrique Berduc	Multiple Use Reserve	5.64	Low Probability
ARG	Limay Mahuida	Nature Reserve	71.74	Low Probability
ARG	Parque Luro	Flora and Fauna Reserve with Managed Resources	96.77	Low Probability
ARG	La Reforma	Nature Reserve	82.94	Low Probability
ARG	Laguna Guatrache	Nature Reserve	54.62	Low Probability
ARG	Laguna La Felipa	Nature Fauna Reserve	12.76	Low Probability
ARG	Riacho Teuquito	UNESCO-MAB Biosphere Reserve	897.17	Observation
ARG	Valdés	UNESCO-MAB Biosphere Reserve	19,480.89	Attention
ARG	Yabotí	UNESCO-MAB Biosphere Reserve	2,280.86	Low Probability
ARG	Las Yungas	UNESCO-MAB Biosphere Reserve	13,490.20	Low Probability
ARG	Patagonia Azul	UNESCO-MAB Biosphere Reserve	30,640.05	Observation
ARG	Laguna Brava	Provincial Refuge	4,186.14	Low Probability
ARG	Laguna Salada Grande	Forest Reserve	2,976.23	Attention

ARG	Chasico	Nature Reserve of Define Objects	78.13	Low Probability
ARG	Piñalito	Provincial Park	37.87	Low Probability
ARG	Salto Encantado Valle Ao. Cuña Piru	Provincial Park	9.18	Low Probability
ARG	Santa Maria del Aguaray mini	Private Reserve	0.24	Low Probability
ARG	Guardaparque Horacio Foerster	Provincial Park	41.64	Low Probability
ARG	Cruce Caballero	Provincial Park	5.37	Low Probability
ARG	Araucaria	Provincial Park	0.92	Low Probability
ARG	Andres Gai	Protected Landscape	0.12	Low Probability
ARG	Corpus	Ichthyic Reserve	8.35	Low Probability
ARG	Esmeralda	Provincial Park	312.74	Attention
ARG	Moconá	Provincial Park	7.53	Low Probability
ARG	Lote \C\" Huerto Municipal"	Municipal Nature Park	0.95	Low Probability
ARG	Esperanza	Provincial Park	6.71	Low Probability
ARG	Aguaray-mí	Private Reserve	32.67	Low Probability
ARG	Timbó Gigante	Private Refuge	1.40	Low Probability
ARG	Laguna Aleusco	Tourist Nature Reserve	10.16	Low Probability
ARG	Cabo dos Bahías	Tourist Nature Reserve	1.94	Low Probability
ARG	Tomo	Private Reserve	15.22	Low Probability
ARG	Yarará	Municipal Nature Park	0.10	Low Probability
ARG	Punta del Márquez	Tourist and Scientific Research Nature Reserve	0.51	Low Probability
ARG	Costa Atlántica Tierra del Fuego	Hemispheric Shorebird Reserve	761.54	Alert
ARG	Rio Limay	Protected Nature Area - Protected Landscape	170.08	Low Probability
ARG	Meseta de Somuncurá	Protected Nature Area	16,158.03	Alert
ARG	Ría de Puerto Deseado	Intangible Nature Reserve	75.55	Low Probability
ARG	Península San Julián	Provincial Reserve	74.40	Low Probability
ARG	Cueva de las Manos	Nature Historical and Cultural Heritage Site	101.67	Low Probability
ARG	Tucu-Tucu	Provincial Reserve	1,826.33	Attention
ARG	Meseta Lago Strobel	Reserve with purposes of public utility	121.27	Low Probability
ARG	Pint Rupestres Rio Chalia o Shehuen	Provincial Reserve	132.46	Observation
ARG	Isla Solitaria	Limited Use Area Under Special Protection	68.90	Low Probability
ARG	Los Escarchados	Provincial Nature Reserve	21.04	Low Probability
ARG	Bloque Herratico	Nature Monument	26.28	Low Probability
ARG	Laguna Azul	Provincial Reserve	13.03	Low Probability
ARG	Cabo Vírgenes	Provincial Reserve	24.34	Observation
ARG	Aves Migratorias	Provincial Reserve	58.83	Low Probability
ARG	Bahía San Julián	Limited Use Area Under Special Protection	28.56	Low Probability
ARG	Bahía Laura	Intangible Nature Reserve	51.84	Low Probability
ARG	Isla Pinguinos	Provincial Reserve	9.31	Low Probability
ARG	Monte Loayza	Provincial Reserve	76.06	Low Probability
ARG	Cabo Blanco	Intangible Nature Reserve	36.57	Low Probability
ARG	Barco Hundido	Provincial Reserve	111.32	Low Probability
ARG	Humedal Caleta Olivia	Provincial Reserve	2.74	Low Probability
ARG	Meseta Espinosa y El Cordon	Hydrological Reserve	2,635.01	Observation
ARG	Península de Valdés	Tourist Nature Reserve	3,875.88	Low Probability
ARG	Bosque Petrificado Ea. La Urbana	Provincial Nature Reserve	320.78	Low Probability
ARG	Cañadón de Profundidad	Provincial Park	0.52	Low Probability

ARG	Fachinal	Provincial Park	0.51	Low Probability
ARG	Rincon Nazari	Urban Nature Reserve	0.11	Low Probability
ARG	Tupa Poja - Lote 71 A	Private Reserve	0.45	Low Probability
ARG	Alto Andina de la Chinchilla	Provincial Reserve	3,217.20	Low Probability
ARG	Olaroz Caucharí	Provincial Faunal Reserve	2,092.92	Low Probability
ARG	Los Andes	Nature Wildlife Reserve	15,191.63	Attention
ARG	Domuyo	Protected Nature Area	930.54	Low Probability
ARG	Cerro Aconcagua	Provincial Park	657.16	Low Probability
ARG	Laguna del Diamante	Nature Reserve	1,978.77	Low Probability
ARG	Cordon del Plata	Provincial Park	1,759.61	Low Probability
ARG	Volcán Tupungato	Provincial Park	1,857.19	Low Probability
ARG	Castillos de Pincheira	Protected Landscape Reserve	4.69	Low Probability
ARG	Caverna de las Brujas	Nature Reserve	1.31	Low Probability
ARG	Los Morrillos	Wildlife Refuge	195.44	Low Probability
ARG	Puente del Inca	Nature Monument	5.49	Low Probability
ARG	Centro Biologico Pilaga - Zoo	Provincial Reserve	5.96	Low Probability
ARG	Laguna Hu	Hunting Reserve	14.31	Low Probability
ARG	El Bagual	Private Reserve	32.25	Low Probability
ARG	Agua Dulce	Hunting Reserve	79.30	Attention
ARG	Pampa del Indio	Nature Park	222.86	Attention
ARG	Divisadero Largo	Nature Reserve	5.08	Low Probability
ARG	Laguna La Salina	Nature Reserve	36.87	Attention
ARG	Ñancuñan	Ecological and Forest Reserve	129.49	Low Probability
ARG	Telteca	Cultural and Nature Reserve	384.38	Low Probability
ARG	Lote 11 Ñacuñan	Forest Reserve	77.59	Low Probability
ARG	Lote 9 Ñacuñan	Forest Reserve	152.45	Low Probability
ARG	Sierra Pintada	Multiple Use Reserve	46.34	Low Probability
ARG	Presidente Sarmiento	Provincial Park	9.20	Low Probability
ARG	Afloramiento Limoso	Protected Landscape	6.55	Low Probability
ARG	Loma de las Tapias	Nature Park	55.81	Low Probability
ARG	El Mangrullo	Multiple Use Reserve	87.52	Low Probability
ARG	Punta Loma	Tourist Nature Reserve	17.12	Low Probability
ARG	Punta León	Tourist Nature Reserve	3.41	Low Probability
ARG	La Humada	Nature Reserve	60.50	Low Probability
ARG	Embalse Casa de Piedra	Nature Reserve	89.44	Low Probability
ARG	Pichi Mahuida	Nature Reserve	78.97	Low Probability
ARG	Valle Cretacico	Protected Landscape	2,407.31	Attention
ARG	Bosque Petrificado Valcheta	Nature Monument	1.64	Low Probability
ARG	Bahía de San Antonio	Protected Landscape	808.03	Low Probability
ARG	Piedra del Fraile	Wilderness Nature Reserve	48.09	Low Probability
ARG	Alto Iguazu	Wilderness Nature Reserve	0.75	Low Probability
ARG	La Ascensión	Wilderness Nature Reserve	145.77	Low Probability
ARG	Aconquija	National Reserve	120.46	Low Probability
ARG	Aconquija	National Park	652.30	Low Probability
